RE: Site Inspection, DOE/049/004-Filtrol Clay Pit

On May 10, 1988 Jerry Mansfield of State Lands and I inspected the reclaimed Filtrol Clay Pit. Guss Manwaring of Coal System's, Inc. was the primary contractor and met us on site. An excellent job has been done in regrading the old clay pit to a non-impounding condition and in elimination of the highwalls (see attached before and after photos). The entire 10 acre area has been seeded and fertilized.

Jerry Mansfield plans to release the entire \$25,000 bond on the site. I recommend that we close our D.O.E. file also.
